

REPUBLICANS WANT YOU TO PICK UP THE CHECK

*Young Americans will be forced to foot the bill for the
Republican Party's irresponsible fiscal policies*

Congress recently passed the 2006 Republican Budget. This bogus budget, which Republican's claim will cut down deficits, actually continues to add to our nation's already record debt, punting the costs of the Iraq war and other programs to future generations.

In less than five years, Republicans have turned a projected ten-year \$5.6 trillion surplus into a projected ten-year \$4 trillion deficit. That much money is hard to get your mind around. To put it in perspective, one trillion seconds ago Neanderthal's wandered the earth.

Republican deficits add every year to the ballooning national debt. Who will pay off our national debt? You, the young American taxpayers! The 2006 Republican Budget raises the debt limit for an incredible fourth year in a row (the debt limit is a lot like a credit card limit). Today, our country's debt is \$7,761,346,696,895.51. Your share of the debt is \$26,216.43.

In addition, the Republicans have spent big bucks on tax cuts for the wealthiest 1% of Americans who average \$1 million a year. This give away to the wealthy means less money is available for investments in important domestic programs that ensure every American has the opportunity for a good education and to live in a safe neighborhood. The Republican 2006 Budget cuts funding for education, student loans, the environment, and job training programs.

This immoral Republican Budget is a raw deal for America's youth.
